

CT/MR 2/3 Channel Endometrial Applicator Sets

SETM1405, SETM0917, SETM0916

Innovative technology and enhanced clinical advantages that facilitates CT and MR based brachytherapy planning.

Endometrium

Simplicity

The CT/MR 2/3 Channel Endometrial Applicator is designed for simplicity, even in the most advanced settings. It enables accurate and complete treatment with multiple lateral intrauterine tube spread distances and the ability to use a single applicator as either a 2 or 3 channel set. The single bracket connects all 3 intrauterine tubes with one lock knob and the key and lock design ensures proper lateral tube alignment.

Flexibility

The CT/MR 2/3 Channel Endometrial Applicator is available in 3 cm or 5 cm configurations, both of which can be used as either 2 or 3 channel applicators to effectively treat a variety of anatomies and disease states.

Reliability

The titanium construction with laser welded connections allows for enhanced stability and torque resistance. The key and lock design ensures proper lateral tube alignment in every case.

Features

- Autoclavable components
- Expected lifetime is 5 years
- Configurations for 3 cm and 5 cm spread
- 3.2 mm tube diameter
- Substantial dose coverage with a single set enabling two or three intrauterine tube configurations
- Simple, key lock bracket connection
- Applicator available with connections for Eckert & Ziegler BEBIG afterloaders, Varian and Elekta/Nucletron transfer tubes*
